

Fromfroid

une technologie d'avance —●

FROMFROID is a French company specialized in air conditioning system and industrial refrigeration. We are located in north of France and do most of our business worldwide.

For our development, we are looking for an industrial automation engineer with at least two year of experience (industrial programming + commissioning at the Client's factory).

The objectives of the Automation Engineer are:

- Defining properly the needs of the Client (intern or extern)
- Selecting the components
- Negotiation with the suppliers
- Programming
- Testing
- Commissioning on site
- Training of people on site

At FROMFROID, you will work in partnership with the project engineer and will give support to find the best solution, from a technical and cost point of view.

Mobility is not a problem for you and you can adapt to other cultures easily.

You speak English and ideally you have some basis in French.

Please, send your resume to : thierry.paupardin@fromfroid.com

Diploma: Industrial automation Engineer

Experience: from 1 to 5 years

Mobility: International

Language: English (fluent), French (basis would be an advantage)
